Class X **Percentage - 78.57%**   *Andhari, India*

EXPERIENCE

The Sparks Foundation   **Feb 2022 – March 2022**
Web Development And Designing Intern
- Designed and developed dynamic and responsive Banking website using **HTML, CSS, JavaScript, and Bootstrap**
- There are several sections like View All Customers,Select and View one Customer,Transfer Money

PROJECTS

Weather Website
- Build a project that shows weather of a location using HTML,CSS,JavaScript,Express Js.
- Users can input a location and the app will display the current temperature, wind speed, humidity, and other relevant weather data.
- Users can customize the app to display temperatures in Celsius or Fahrenheit, choose their preferred language, and save their favorite locations for easy access.

News Web
- Created a user-friendly interface with HTML and CSS to ensure a seamless browsing experience.
- Utilized JavaScript to enable dynamic content loading and enhance interactivity.
- Implemented API integration to fetch data from external sources and display the latest news.
- Organized news articles into three distinct sections: IPL, finance, and politics.
- Successfully deployed the fully website on the Netlify platform to get it live and running.
